NTS-pico3 is 3rd generation PICO miniature time server from Elproma. It delivers UTC ref. time directly to network using NTP and PTP protocols. Standard version of product includes software time stamping, but hardware stamping is available too. It seriously improving accuracy of synchronization. NTS-pico3 is equipped with single 100Mbps. It supports both IPv4 and IPv6*. The Server has been designed for small industrial LAN. It has natural air cooling and it can operate 24/7 in taught environmental conditions. It is powered 9-30 VDC. The NTS-pico3 time server supports crypto-authentication for NTP operations. Product at arrival is equipped with 38dB GNSS antenna and 30 meter coax cable SMA ended. Surge arrester shall be purchased separately. A built-in GNSS satellite receiver includes TCXO oscillator for a short-time holdover. Server supports simultaneously GPS and GLONASS or GALILEO* or BEIDOU*. NTS-pico3 has ultra fast Time To First Fix (TTFF) start-up supported by SBAS systems. Multiple pico can be mounted in rack"19 cabinet acting multiple-LAN time server (1U).
